

RONIT SHARMA

Data Scientist | Machine Learning & AI Engineer

+91-9599281425 | ronitsharma1608@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven **Data Scientist and AI/ML Engineer** with hands-on experience building **production AI systems** - multi-agent voice bots, LLM applications, and hybrid RAG pipelines - currently interning at DMI Infotech. Strong foundation in **machine learning, deep learning, statistics, and data analytics**, with proven impact (**80%+ automation, +30% retrieval accuracy, +15% conversion**). Seeking full-time roles in Data Science, Machine Learning, or AI Engineering. Known for strong communication, problem-solving, analytical thinking, and team collaboration.

EDUCATION

Delhi Technological University (formerly DCE)

Nov 2022 - Jul 2026

B.Tech, Mechanical Engineering | CGPA: 7.52 / 10

TECHNICAL SKILLS

Languages & Databases: Python, SQL, PostgreSQL, MySQL

Machine Learning & Deep Learning: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Ensemble Methods (XGBoost, LightGBM, CatBoost), Scikit-learn, PyTorch, Neural Networks, Computer Vision, Feature Engineering, Model Evaluation, Model Deployment

AI, NLP & LLMs: Large Language Models (LLMs), Natural Language Processing (NLP), RAG Pipelines, Multi-Agent Systems, LangChain, LangGraph, Transformers, Prompt Engineering, Vector Databases (FAISS), Semantic Search, Embeddings, Conversational AI

Data Analysis & Statistics: Data Analysis, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistics, Hypothesis Testing, Data Visualization, Pandas, NumPy, ETL, Data Pipelines

Tools & Platforms: Git, Docker, FastAPI, Streamlit, AWS, MLOps, Tableau, Adobe Analytics, Jupyter

EXPERIENCE

DMI Infotech Limited

Jan 2026 - Present

Data Science Intern, Consumer Analytics - New Delhi

- Built a production **multi-agent voice bot** (6 specialized agents for support, sales, subscriptions, and order management) handling real-time Japanese/English calls, automating **80%+ of inbound workflows** and cutting manual handling by **200+ hours/month**.
- Designed FSM-driven agent workflows across **30+ state graphs** and integrated a **hybrid RAG pipeline (FAISS + BM25)** over 500+ products, improving retrieval accuracy by **nearly 30%**.
- Engineered **STT/LLM/TTS** pipelines with the LiveKit Agents SDK enabling **sub-500ms** voice responses, seamless agent-to-agent handoffs, and buffer speech to mask transitions.
- Extended the framework to deliver **multiple client-specific voice bots**, each powered by its own **product-catalog RAG** knowledge base and custom conversation flows, reusing the multi-agent architecture across deployments.

Hero MotoCorp Limited

May 2025 - Jul 2025

Summer Intern, Digital & IT - Gurgaon

- Analyzed **50,000+ records** in Python (Pandas, NumPy, Seaborn) and tracked customer journeys and conversion funnels in Adobe Analytics across the VIDA and ICE sites, lifting conversion rates by **15%**.
- Uncovered that the **100CC Deluxe** model drove **40% of first-time sales** (ages 20-40) and **77.7% of repeat purchases** within 24-36 months, shaping data-backed marketing recommendations.
- Built **ETL** processes and Tableau/Seaborn visualizations that cut data-processing time by **35%** and raised finance adoption by **10%**, targeting regions (Uttarakhand, Puducherry, Assam) with 2-3x higher uptake.

PROJECTS

DocMind - Local RAG Pipeline

Python, Mistral 7B, FAISS, BM25, Sentence Transformers, FastAPI, Streamlit

- Built a **privacy-first RAG** system to chat with PDFs fully locally, with **sub-2s retrieval** across **10,000+ chunks** via a 70/30 hybrid fusion of FAISS semantic search and BM25 keyword matching.
- Added sentence-aware recursive chunking and **cross-encoder reranking (+25% relevance)** plus a content-hash embedding cache (**40-60% faster** repeat ingestion).
- Deployed a decoupled **FastAPI + Streamlit** app with source citations and **zero external API calls**, keeping responses **under 2 seconds** for complete on-device privacy.

Smart Supply Chain Intelligence Platform

Python, scikit-learn, XGBoost, LightGBM, CatBoost, SQLAlchemy, Streamlit

- Built an **end-to-end ML platform** that forecasts demand, classifies stockout risk (Low/Medium/High), and recommends reorder actions across **10,000+ records** via a 14-page interactive dashboard.
- Automated a training pipeline **benchmarking 4 tree-ensemble models** with cross-validation, auto-selecting the best performer per task.
- Engineered a **decision layer** converting predictions into actions - reorder timing/quantity with a 7-day safety buffer, supplier flagging, and demand-swing simulation.
- Automated **feature engineering** and built an interactive dashboard with drill-downs across **4 data domains** (sales, inventory, suppliers, orders) for real-time decision support.

CERTIFICATIONS

- Coursera** - Supervised Machine Learning (Regression & Classification); Advanced Learning Algorithms (Neural Networks)
- Kaggle** - Intermediate Machine Learning, Pandas, Feature Engineering, Intro to Deep Learning, Computer Vision
